Junghans 2023.

**All forms of
time
beautifully
combined.**

What could be more inspiring for a watch manufacturer than time and its forms – past, present and future? For Junghans, designing modern watches and classics in 2023 means not only anticipating trends but also valuing tradition, such as the 200th birthday of our company founder Erhard Junghans. In his honour we have designed two anniversary models in gold. Our fascination with aviation over the past almost 100 years is clearly evident in the Meister Pilot, which we expand in 2023 with exciting new models. Junghans demonstrates its deep-rooted passion for sports in our modern day as the Official Timing Partner of the FIS Nordic World Ski Championships by launching two limited special edition models. And the new Meister fein Automatic models make tomorrow shine with a little more colour. As varied as our innovations are, they have one thing in common: every Junghans watch combines all forms of time in the most beautiful way.

Erhard Junghans: Signs of the **times.**

Erhard Junghans was born in the Black Forest on 1 January 1823. In 1861, he and his brother-in-law founded the Junghans company in Schramberg, where he would set many things in motion in just nine years until his early death. The visionary Erhard Junghans recognised the signs of the times early on: to compete against cheap imported watches, he introduced new innovative manufacturing processes – and laid the foundation for unparalleled success. In 1903, the company became the world's largest watch manufacturer and the name Junghans was internationally synonymous with precision and reliability. These are values that have shaped the brand's identity to this day. In 2023, on the occasion of the 200th anniversary of his birth, we honour Erhard Junghans with two edition models – signs of the times as unique as their namesake.

Meister feyn Automatic Edition Erhard.

Inspired by the **spirit** of the **founder.**

Any tribute to Erhard Junghans is, of course, also a tribute to classic watch design. It starts with the historical Junghans lettering and ends with the fine Roman numerals on the dial. Acting like elongated indices, they are subtly coordinated with the geometry of the Meister line. The case back is also inspired by its founder: The domed sapphire crystal bears a signature and the two-armed oscillating weight has an engraved profile of Erhard Junghans: a beautiful reminder that his spirit still drives the company today.

Meister feyn Automatic
Edition Erhard
27/9301.00
18 carat yellow gold

Meister feyn Automatic
Edition Erhard
27/9300.00
18 carat white gold

The value of Erhard Junghans' contribution to watch history is inestimable. These edition models, limited to 200 pieces each, pay tribute to this and bear his image and signature on the back. Be it in yellow or white gold, every glance at the Meister feyn Automatic Edition Erhard brings 200 years of watch history to life.

Self-winding movement J800.1 | case 18 carat gold Ø 39,5 mm | sapphire crystal | domed sapphire crystal case back | water-resistant up to 3 bar | limited to 200 pieces each

Unceasing passion for what is precious and beautiful in life.

Was everything really so much better in the past? Surely not. But nostalgia and the yearning for the “good old days” simply seem to be part of human DNA. Today, the product design of past decades is again in great demand since it is characterised by outstanding quality, meticulous craftsmanship and attention to detail – characteristics that are captured in the Junghans retro models. In making them, we invest the same passion that went into crafting the original watches. We always take great pains to interpret the past with the accent on modernity. And of course incorporate the latest technology. To the delight of watch lovers all over the world who, like us, are passionate about what is precious and beautiful. The latest proof of this unceasing passion is the Meister Pilot – the epitome of the classic pilot’s watch.

stainless steel case Ø 43.3 mm |
sapphire crystal |
water-resistant up to 10 bar

Time in flight:

A fascination with aviation.

Aviation has always held a special fascination for Junghans. No wonder since historically the fields of aeronautics and chronometry are closely linked. In the 1930s, Junghans manufactured control panel instruments for aeroplanes and airships to measure flight time. In the 1950s, Junghans devised a now legendary pilot chronograph for the German Bundeswehr. The Meister Pilot, which we expand in 2023 with exciting new models, also belongs to this tradition. The Meister Pilot is a visually nostalgic but nonetheless modern watchpiece. It is equipped with state-of-the-art technology that will captivate retro fans, aviation enthusiasts and design connoisseurs alike.

Meister Pilot Chronoscope
Desert
27/3398.00

One look at the Meister Pilot Chronoscope Desert is enough to conjure up images of majestic sand dunes in the mind's eye. Whether you're in the desert or in the city, by day or by night, the distinctive luminescent numerals and hands and the sapphire crystal with anti-reflection coating on both sides ensure optimum readability.

Self-winding movement J880.4 | stop function | stainless steel case DLC-coated Ø 43.3 mm | bi-directional turning bezel | sapphire crystal | water-resistant up to 10 bar

Meister Pilot Chronoscope
27/3591.00

Meister Pilot Chronoscope
27/3794.00

Our fascination with aviation is clearly evident in the Meister Pilot Chronoscope: Distinctive luminescent numerals and hands on the dial ensure optimum readability. The ergonomically designed bezel provides exceptional grip, as well as an unique look.

Self-winding movement J880.4 | stop function | stainless steel or DLC-coated case Ø 43.3 mm | bi-directional turning bezel | sapphire crystal | water-resistant up to 10 bar

Meister Pilot Chronoscope
Navy Blue
27/3396.00

Ready for any adventure: The design and function of the Meister Pilot Chronoscope is based on the original version from the 1950s. Its dynamic navy blue colour promises an adrenaline-charged journey through time. The bi-directional turning bezel allows precise adjustment – even while wearing gloves. The watch is limited to 300 collectors' items.

Self-winding movement J880.4 | stop function | stainless steel case DLC-coated Ø 43,3 mm | bi-directional turning bezel | sapphire crystal | water-resistant up to 10 bar | limited to 300 pieces

Meister Pilot Automatic
Navy Blue
27/4397.00

The optimum readability of the Meister Pilot Automatic is both crucial for pilots and satisfying for watch lovers. Based on authentic control panel instruments, the large numerals on the date display emphasise the cockpit character of the watch. The small seconds with its red hand ensures additional readability.

Self-winding movement J800.1.6 | stainless steel case DLC-coated Ø 43,3 mm | bi-directional turning bezel | sapphire crystal | water-resistant up to 10 bar

Meister Telemeter
27/3380.02

Elegance, technology and a sporty presentation combined in one extraordinarily beautiful watch. Elegant case shape and fine silver dial, technological scales for telemeter and tachymeter, and the sporty aspects of striking luminescent numerals and hands. Today, the Meister Telemeter is just as sensational as it was when it was first unveiled 70 years ago.

Self-winding movement J880.3 | stop function | tachymeter and telemeter scale | stainless steel case Ø 40.8 mm | sapphire crystal | glass case back | water-resistant up to 5 bar

Junghans
CHRONOGRAPH

Sekunden-Hauptskala zeigt mit großen Strichen die Sekunden, mit kleinen Strichen $\frac{1}{4}$ Sekunden.

Kleine Sekunden-Skala mit normalem, immer mitlaufendem Sekundenzeiger.

Tachometer-Skala mit Basis 1000 Meter zur direkten Ablesung der Geschwindigkeit in Kilometer pro Stunde durch Stoppen der Zeit für 1000 Meter, z. B. zwischen zwei Kilometersteinen.

Druckknopf zum Zurückstellen der Stoppzeiger auf Null.

Kleine Minuten-Additionsskala zum Zählen der Minuten beim Stoppen. — Die 3 langen Striche bei 3, 6, 9 Minuten für Telefongespräche entsprechend der Tarifrate von 3 Minuten.

Druckknopf (für Sekundenaddition) zum Legensetzen und Anhalten des Stoppmechanismus.

Telemeter-Skala zur direkten Ablesung der Entfernung in Kilometer durch Stoppen des Zeitunterschiedes zwischen Lichtbeobachtung und Hören des Schalls, z. B. Zeitunterschied zwischen Blitz und Donner.

Es empfiehlt sich, den großen Sekundenzeiger seinem Zweck entsprechend nur zum Stoppen laufen zu lassen.

UHRENFABRIKEN
Gebrüder Junghans & Co.
SCHRAMBERG IM SCHWARZWALD

The telemeter and tachymeter display were first combined in a Junghans chronograph in 1951. This image shows historical brochures advertising the sporty-elegant innovative watches.

Meister Driver Chronoscope
27/3684.02

Our passion for cars began in 1892, with the friendship between Arthur Junghans and motorcar pioneers Wilhelm Maybach and Gottlieb Daimler.

Meister Driver
Chronoscope
27/3686.46

This fascination is particularly evident on the dials of the Meister Driver Chronoscope: the layout of the instrument panel in the classic cars is depicted here. Combining nostalgic charm with a pioneering spirit – on your wrist.

Self-winding movement J880.3 | stop function | stainless steel case Ø 40.8 mm | sapphire crystal | glass case back | water-resistant up to 5 bar

A thrilling journey through time. The Junghans Terrassenbau Museum.

Designed by Stuttgart's industrial architect Philipp Jakob Manz, the Junghans terrace building is one of the most spectacular industrial constructions of the early 20th century – an edifice representative of architectural history and watchmaking tradition like no other. This distinction was honoured in 2018 with the opening of the Junghans Terrassenbau Museum in commemoration of its 100th anniversary. Extensively renovated, the listed building invites you along for a most fascinating journey through time – From the world-renowned Black Forest clocks and the history of Junghans, up until the days of orchestrions and musical clocks. More information can be found at [junghans-terrassenbau-museum.de](https://www.junghans-terrassenbau-museum.de) – we look forward to seeing you!

Meister Terrassenbau: A distinctive building. A distinctive watch.

Incorporating defining design features of this industrial landmark, the momentous architecture is fittingly commemorated in the Meister Terrassenbau models: The meandering design of the dial's minute track pays homage to the wall decorations, and the dark green of the alligator leather strap to the wall tiles in the stairways. The case back allows a view of the movement through a glass window in a depiction of the terrace building. Both models are limited to 1,500 watches worldwide.

Stainless steel case | sapphire crystal | glass case back | water-resistant up to 5 bar

1972

The enthusiasm for sports has a long history at Junghans, from hand stopwatches in the 1920s to sports timekeeping where Junghans set new standards in the 1960s and after. In 1972, Junghans launched a sporty line of wristwatches. One of the most distinctive models quickly became a coveted collector's item.

The historical archetype of the 1972 Competition

Sports performance for the here and now

The 1972 Competition is inspired by this classic watch: the oval case and the pushers and crown placed at the top, as on a hand-held stopwatch, lend an extraordinary dynamic to the watch. The anthracite-coloured dial is in stark contrast to the orange of the totalisers and tachymeter scale. With its state-of-the-art features – from the durable sapphire crystal and screwed crown to the strap fixed with stainless steel screws – the watch projects the typical attitude towards life in the 1970s into the modern day.

Self-winding movement J880.5 | stop function | stainless steel case 45.5 x 41.0 mm | screwed crown | sapphire crystal | water-resistant up to 10 bar | limited to 1,972 pieces

27/4203.00

1972 Chronoscope Solar
14/4200.00

1972 Chronoscope Solar
14/4202.44

The design language of the 1970s maintains all of its fascination to this day. This is no more evident than in the 1972 Chronoscope Solar: the characteristic massive case form, the striking orange highlights, the distinctive square appliqués on the dial, and the overall sporty presentation. As contemporary as it is sustainable: the solar drive.

Solar quartz movement J622.50 | stop function | alarm | power reserve up to 6 months | stainless steel case Ø 43.3 mm | turning bezel | sapphire crystal | key lock for alarm | water-resistant up to 10 bar

” Ski jumping is all about precision, dynamism and timing. No wonder Junghans watches fascinate me.“

Karl Geiger, Junghans Brand Ambassador

From the allure of sports and time.

There are watches that look sporty. And there are those you can also wear while doing sporting activities. Such as the Junghans watches that are ideally equipped for this, with their dynamic design, screwed crowns, robust straps, water resistance up to 20 bar – not forgetting the durable sapphire crystal. It is not only our watches that demonstrate their sportiness. Junghans also plays an active role in sports: in 2023, Junghans is again the Official Timing Partner at the FIS Nordic World Ski Championships for the third time in a row – together with our brand ambassador Karl Geiger, who was honoured as the “Skiing Athlete of the Year 2021”.

1972 Competition
FIS Edition Lemon
27/4305.00

Go for gold? Go for lemon: The intense luminescent colour of the new special model harks back to the extrovert style of the 1970s. Just like its design, the oval case shape and controls positioned on top mirror the style of a hand-held stopwatch.

Self-winding movement J880.5 | stop function | stainless steel case 45,5 x 41,0 mm | screwed crown | sapphire crystal | water-resistant up to 10 bar | limited to 150 pieces

1972 Chronoscope Quarz
Edition FIS Lemon
41/4369.00

Exact timing is everything: after all, when does the opportunity arise to own a 1972 Chronoscope in coveted lemon? The extravagant colour and dynamic design revive the spirit of the 1970s.

Quartz movement J645.83 | stop function | 24-hour display | stainless steel case Ø 43.3 mm | turning bezel | sapphire crystal | water-resistant up to 10 bar | limited to 150 pieces

No time for compromises: Meister S Chronoscope.

Meister S
Chronoscope
27/4227.00

At work. At sports. At leisure. Whatever you may be doing, the Meister S Chronoscope in midnight blue always retains its uncompromising functionality. And uncompromising aplomb. The ergonomic strap has a raised Junghans logo in the synthetic rubber, which allows the skin to breathe.

Self-winding movement J880.1 | stop function | stainless steel case Ø 45.0 mm | screwed crown | sapphire crystal | water-resistant up to 20 bar

Meister S
Chronoscope
27/4023.44

Sporty. Masculine. Uncompromisingly resistant. All thanks to the solid, dynamically curved edge protection, anti-reflection sapphire crystal and water resistance to 20 bar. The stainless steel bracelet is equipped with a fine adjustment feature that makes it easy to adjust the bracelet length.

Self-winding movement J880.1 | stop function | stainless steel case Ø 45.0 mm | screwed crown | sapphire crystal | water-resistant up to 20 bar

The name speaks for itself: The Meister fein Automatic has everything that is synonymous with a Junghans Meister – a congenial combination of technology and aesthetics – to create an exceptionally fine presentation. Its charming elegance is achieved in the harmonious composition of fine hour markers and exquisite hands. The domed, spherical sapphire crystal and discus-shaped case create a compact unit as if moulded as one: innovative design with pleasant wear comfort. A worthy, modern ambassador for the Meister line – and already a watch with classic status.

Meister feyn Automatic Signatur: Refinement is the driving force.

What the shape and colour suggest is confirmed by the historical Junghans lettering: the Meister feyn Automatic Signatur is already a true watch classic. The refined design language is systematically continued in its inner workings – and even reveals itself to be the driving force in the two-armed oscillating weight developed and assembled in Schramberg. The warm grey tone of the dial with sunray brush lends a discreet sheen to the otherwise purist design. Like the oscillating weight and lettering, it is a reference to the origins of the Meister line, masterfully reinterpreted for today's world.

Meister feyn Automatic
Signatur
27/4355.00

The Meister feyn Automatic Signatur excels with its many intricate, valuable details: Like the flat and disc-shaped case. Like the curved front and case back glass made of anti-reflective sapphire crystal. Like the dial with the historical Junghans logo and the discreet diamond-effect lines for the hour markers. An extra large, see-through case back allows to admire the two-arm oscillation weight.

Self-winding movement J800.1 | stainless steel case Ø 39.5 mm | sapphire crystal | domed sapphire crystal case back | water-resistant up to 5 bar

The energy of the sun. The aspiration of the Meister.

Filigree design. Precise connected radio-controlled movement. Sustainable solar power source. Practical stop function. Easy to operate despite complex technology. There is no denying that the Meister fein Chronoscope MEGA Solar combines many excellent features. The extremely fine, symmetrical appearance of the watch conceals trend-setting watch technology made in Schramberg: a specially developed solar cell drives the highly efficient and absolutely precise app-connected radio-controlled movement with the energy of the sun. The Meister fein Chronoscope MEGA Solar represents a statement of Junghans' high level of technological and design excellence.

Meister fein Chronoscope
MEGA Solar
59/7201.00

Meister fein Chronoscope
MEGA Solar
59/4200.00

Both innovative and harmonious: spherical sapphire crystal and an extra-flat watch case define the design language of the Meister fein Chronoscope MEGA Solar. The totalisers on the domed, light-transparent dial arrange various different indications into a perfectly symmetrical design.

Connected RC solar movement J110 | stop function | perpetual calendar | power reserve up to 3 years | stainless steel or PVD-coated case Ø 39,5 mm | sapphire crystal | glass case back | water-resistant up to 5 bar

Exquisite
shapes.

The new Meister fein Automatic.

Modern
colours.

Is life dull? Not at all, thanks to the new Meister fein Automatic. That's because it is extrovert, creative and full of life, with delicate design and fashionable colours. Whether it's in petrol & arctic blue, moss green & apple green or blackberry & pink, the colour of the dial always matches the strap perfectly. The modern size of 39.5 mm in diameter emphasises the modern style of the watch and so do the sophisticated features with sapphire crystal and self-winding movement. With the new Meister fein Automatic, Junghans proves it is possible to create perfect harmony with purist forms, extrovert colours and modern watch technology.

Meister fein Automatic
27/4356.00

Meister fein Automatic
27/4357.00

Meister fein Automatic
27/4358.00

Express yourself: with the three new models of the Meister fein Automatic. The 12 o'clock indices crafted with precious diamonds has its symmetrical counterpart in the vertically integrated Junghans logo at 6 o'clock. The hour markers and date display reiterate the colour of the strap – to produce perfect visual harmony.

Automatic
27/4230.00

The meticulous, modern design of the Meister fein Automatic symbolises a whole new geometry for the Meister line. The domed shape of the case and sapphire crystal immediately draw the observer's attention to the simple, yet superior design of the dial.

Self-winding movement J800.1 | stainless steel or PVD-coated case Ø 39.5 mm | sapphire crystal | glass case back | water-resistant up to 5 bar

Reduced in diameter, unchanged in design: the Meister fein Kleine Automatic retains the beautifully shaped geometry of the watch in the new, even more filigree version. The delicate design is combined with a rich diversity of colours.

Self-winding movement J800.1 | stainless steel or sand gold PVD-coated case Ø 35.0 mm | sapphire crystal | glass case back | water-resistant up to 5 bar

For some
master pieces,
it's all in the name.

Timepieces untouched by the passage of time.

What could possibly recount the history of time more accurately than a timepiece? The watches of the Junghans Meister range have provided reliable displays of time for people with style for almost a century, so it's hardly surprising that they are the centrepiece of our collection. Handcrafted with our many years of experience, they captivate with their many loving details. The curvaceous shape of the case with pronounced domed glasses, convex dials and bowl-shaped sub dials create a three-dimensional, and strikingly elegant effect. A transparent case back provides a view of the decorated mechanical movements. Today, the Meister line holds a special appeal to those with a penchant for tradition, as well as to watch fans who are only now discovering the retro style for the first time. Unperturbed by any fashion and trends, the Meister myth continues to outlive time itself.

Meister Chronoscope
27/4222.02

Meister Chronoscope
27/4224.02

Elegant or dynamic? A moot consideration for the Meister Chronoscope. After all, this watch effortlessly combines classic charm with sporty functions. The characteristic bowl-shaped totalisers are a typical feature for the Meister range.

FORM A Chronoscope

Architect, painter, sculptor and product designer Max Bill was strongly influenced by the Bauhaus philosophy – stripping back to the bare essentials. He viewed his work as “shaping the environment“, which required that the results be well designed and practical for everyday use accordingly. This applied in equal measure whether he was occupied with art or product design. After already writing design history with his kitchen, table and wall clocks, 1961 saw the creation of his legendary Junghans wristwatches. These are viewed as design icons today.

Time for Bauhaus.

The state-run Bauhaus was founded more than 100 years ago, and was to prove a long-standing influence on the fields of architecture, art and design. Junghans retains a very special connection with the minimalistic style of this school of thought through Bauhaus scholar Max Bill. The philosophy of the Bauhaus lives on in our max bill models.

The mechanical watch series from Max Bill is still being produced practically unchanged by Junghans to this day – from the puristic dial with distinctly rounded numerals conceived especially for this product, to the convex crystal and flat appearance of the case.

Hand-winding movement J805.1 | stainless steel case Ø 34.0 mm | sapphire crystal | water-resistant up to 5 bar

Perfect proportions, no unnecessary embellishments: a concept which ensures that the max bill watches of today look just as modern as they did more than 60 years ago. Luminous dots at the 3, 6 and 9 o'clock positions, with double dots at 12 o'clock are typical of this series, and guarantee optimum readability of the time.

Stainless steel case | sapphire crystal | water-resistant up to 5 bar
max bill Kleine Automatic: self-winding movement J800.1 | case Ø 34.0 mm
max bill Automatic: self-winding movement J800.1 | case Ø 38.0 mm

max bill Chronoscope
27/4600.02

As with all pieces in this collection, the design of the mechanical max bill Chronoscope is highly impressive due to its focus on the bare essentials. This is clearly evidenced in the plain, minimalistic design of the dial. Relinquishing display of the small seconds creates a particularly striking symmetry.

Self-winding movement J880.2 | stop function | stainless steel case Ø 40.0 mm | sapphire crystal | water-resistant up to 5 bar

max bill Chronoscope
27/4003.46

max bill Automatic
27/4002.46

Focussing on the essentials: When designing his line of watches for Junghans, Max Bill dispensed with all manner of superfluous elements. The artist's meticulous eye for scale is perfectly demonstrated in the proportions of the indices. The resulting watch design has stood the test of time, and is just as fascinating today as it was back then.

Stainless steel case | sapphire crystal | water-resistant up to 5 bar
max bill Chronoscope: self-winding movement J880.2 | stop function | case Ø 40.0 mm
max bill Automatic: self-winding movement J800.1 | case Ø 38.0 mm

Consistent. Sustainable. Designed.

“watches, as far away removed from any fashion as possible, as timeless as can be conceived without forgetting the time.”

max bill

For designer Max Bill, visual sustainability was of paramount importance. This is a claim that the max bill MEGA Solar combines with energy sustainability: the highly efficient app-connected radio-controlled movement is powered by the sun. Every product feature is designed for sustainability: The red strap is made from recycled apple fibre, so it is therefore completely vegan and in harmony with nature. A perpetual calendar, automatic adjustment between summer and winter time and easy setting of time zones using the crown or the Junghans MEGA app make the watch fit for today, tomorrow and the day after tomorrow. A timepiece that will remain modern forever: the max bill MEGA Solar comes closer to this concept than any other.

max bill MEGA Solar
59/4325.02

max bill MEGA Solar
59/7324.02

Effortless elegance: the combination of gold-coloured case and soft grey strap. Powerful statement: the version with the eye-catching red strap.

Connected RC solar movement J101.85 | power reserve up to 3 years | stainless steel or PVD-coated case Ø 38.0 mm | sapphire crystal | water-resistant up to 5 bar

max bill MEGA Solar
59/2021.02

Made of skin-friendly titanium – which is non-corroding, temperature-resistant and surprisingly light – this version of the max bill MEGA Solar is particularly pleasant to wear due to its vegetable-tanned leather strap.

Connected RC solar movement J101.85 | power reserve up to 3 years | titanium case Ø 38.0 mm | sapphire crystal | water-resistant up to 5 bar

Time for

SPACE

for time.

Style is not only lived out on one's wrist, but also in one's home. What could be more appropriate in this regard, than raising the ambience with a design icon from Junghans? The highly aesthetic, puristic wall clocks and table clocks from the max bill line are a statement in every room. However: it is not least the contrasts that add intrigue to the home. The design objects designed by Max Bill can create a tempting contrast and stylish accentuations in practically any environment.

We create time.

The more diverse and high-paced our world develops, the more we long for authenticity and consistency, for genuine things that will maintain their value. Junghans watches are precisely such things: they demonstrate our affinity to pedigree and history, our many years of experience, our dedication to precision and durability – and our passion for creating time. We produce watches for people who share these values, to serve as companions, through all phases of life. Time is the most precious commodity, for everybody, regardless of age. To help create this time, indeed to make that time more pleasant through our watches, is our aspiration and our utmost incentive.

Made in Schramberg.

The art of providing form to a function.

Walking through the process to achieve a perfect result.

Design: The idea for a watch is born. Before the digital design phase begins, our creative product designer first completes a hand-drawn sketch.

Character: In the same way as a fingerprint is like no other, every watch is provided with characteristic Junghans features.

Design engineering: For the production process, final details are determined and tolerances defined. Turning the idea into reality.

Parts manufacturing: In our printing facility the face of the watch is given its definitive features. Dials and date discs for selected models are printed and refined with utmost tact and intuition.

Production: Meticulous manual craftsmanship is applied to assemble numerous individual parts to make up an authentic Junghans. For some models the movement is also assembled completely.

Quality: In a final inspection, every individual watch undergoes a 100% visual and technical check manually.

Service: That which lasts, lasts still longer: thanks to experienced hands performing repairs on your watch.

Sustainable design, imagination and craftsmanship with meticulous attention to detail: Our passion, to create time as beautifully as possible, is evident in every single Junghans watch. We are willing to give everything to this end: From the initial draft to the finished watch – our aim is always to provide the function with the best possible form. A conscientious design process is implemented from the very first step to the very last: Every meticulously measured individual part is subjected to intensive quality control as early as the realisation phase. This is imperative if process reliability is to be guaranteed for production, whereby numerous individual components are assembled to make up an authentic Junghans worthy not only of the classification 'Made in Germany', but specifically "Made in Schramberg".

A journey through time

1861

In collaboration with his brother-in-law, Erhard Junghans establishes “**Zeller & Junghans**” as a business producing clock parts. Initially manufacturing components for Black Forest clocks, the first of their own clocks appeared in 1866.

1903

An annual production of three million clocks cements Junghans’s position as the **largest clock manufacturer on earth**. In the meantime, with production sites and subsidiaries not only in the Black Forest, but also in other locations including Venice and Paris.

1918

Designed by architect Philipp Jakob Manz, the 9-level **terrace building** was completed after a two year construction period. The first Junghans hand-wound watches were produced here in 1927.

1936

Numerous movements were designed and manufactured here from the 1930s. The premium calibres are the heart of the Meister watches, and go on to augment the collection onwards of 1936.

The company Diehl GmbH assumes a majority share. Junghans becomes the **third largest manufacturer of chronometers worldwide**, and the following year unveils the very first automatic chronometer calibre with the J83. The collaboration with Max Bill begins.

1956

In its **100th anniversary year**, Junghans is exporting watches to 100 different countries, with 20,000 watches and alarm clocks being produced daily. The wristwatches designed by Max Bill are unveiled.

1961

Junghans present the first high-precision **Astro-Quartz quartz watch**. As official timekeeper of the 1972 Olympic Games, new standards are being set in sports timekeeping.

1971

After the first serially produced radio-controlled table clock (1985), Junghans introduce the **worldwide first radio-controlled wristwatch. The Junghans Mega 1**. The futuristic asymmetric form was devised in collaboration with FROG Design.

1990

1995

Milestone after milestone: After the first analog radio-controlled watch, new models follow with the most diverse materials and configurations, such as the **first solar-powered radio-controlled watch in a ceramic case**. Variants for the US and Japanese markets are introduced.

2000

Junghans is acquired by the luxury goods group **EGANAGoldpfeil**.

2004

With the **patented multi-frequency radio-controlled movement**, Junghans watches are now able to receive time signals in different countries.

2008

Junghans proves their mechanical competence with the intricate **J325 hand-winding movement**. A multitude of components for the Erhard Junghans 1 model, an homage to the company's founder, are designed and produced in Schramberg.

2009

Outstanding **prospects for the Junghans brand** and the Schramberg site: With the new owners, Dr. Hans-Jochem and Hannes Steim, the company regains its independence.

2011

Junghans celebrates its 150th anniversary – with an official ceremony on its jubilee day and opening of the new company museum a day later. New life is breathed into the Meister range.

A cultural heritage worth protecting: The Steim family purchases buildings of significance on the plot in the Geissshalde, not least the **now listed terrace building**. At the same time, investments are made in new assembly lines and the development of new generations of movements.

2013

The **new FORM line** stands for a clear design language in the tradition of the globally-renowned German industrial design.

2017

The **100th anniversary of the terrace building** is honoured with the opening of a museum sharing the same name, and the **Meister Chronoscope Terrassenbau** models. With development of the connected RC movement J101, Junghans once again set new standards when it comes to precision and aesthetics.

2018

160 years of Junghans – and the story continues. Special anniversary models are being created with meticulous attention to detail – such as the Meister Signatur Handaufzug Edition 160.

2021

We are honouring the **200th birthday** of company founder **Erhard Junghans** with two limited anniversary models in gold. With the Meister fein Chronoscope MEGA Solar, Junghans presents the first app-connected radio-controlled watch with solar power and chronoscope function.

2023

Fancy more Junghans history and stories? You can find a more detailed presentation of our company and product history on our website www.junghans.de or in our digital archive.

An overview of time.

The Junghans — collection.

All Junghans wristwatches are equipped with durable sapphire crystal and are perfectly equipped to cope with the demands of daily life. For more information on the watches, e.g. strap, water resistance and language variants of the date display, please refer to the enclosed price list.

If you have any questions, please contact your local Junghans partner. He will be happy to advise you on choosing the right Junghans watch for you.
